Dimensions: 37" x 6"  
Weight: 15 lbs  
For maximum effectiveness, recharge the Spot Free 5000 water filter after approximately 5000 gallons of use.

Maximum water pressure: 100 psi

Filter: Various ion resins

Polymer matrix: Polystyrene

Structure: Crosslinked with divinylbenzene

Eliminates water spots, stains, odors, and mineral deposits on your boat, vehicle, RV, home, and more. It's the water filter designed for people on the go!

The Spot Free's unique design not only allows the unit to be both convenient and portable, but also gives it the ability to handle high flow rates without any loss of pressure or performance. It thoroughly removes chlorine, ammonia, and hard water minerals—like iron, calcium, and magnesium—from your water supply, making it healthier to drink and a pleasure to clean with.

This system will also extend the life of your plumbing, faucets and fixtures, water heater elements, icemakers, and more by eliminating the costly and corrosive properties that are often found in unfiltered water.

And it's a snap to operate. The water source can be connected at either end of the filtering unit, and the filter can be used in either direc-

tion. Although the system will require periodic regenerations to ensure proper performance, the instructions are easy to follow and simple to complete. Once installed, the palletized softener salt also helps this regeneration process run quickly, taking only about 10 to 15 minutes to complete.

## system highlights

- Puts an end to unsightly water spots and minimizes drying time after each wash, preserving paint luster and brightness.
- Easy to store compact design saves space and allows it to go anywhere—no outside power required.
- Reduces hard water build-up and improves overall water quality by preventing rust stains, calcium deposits, and etching.
- Helps appliances like dishwashers and coffee pots last longer and run smoother.

→ Available in multiple models to suit any application.

→ Softens water for years and regenerates quickly and easily—in about 10 to 15 minutes.

→ Designed explicitly for potable water.

→ Environmentally friendly.

Each filter comes in an attractive package complete with everything you need to filter your water: 1 Spot Free softening unit, 1 pre-filtered housing, 1 carbon block filter, 1 box of hardness testing strips, 1 recharge cartridge, recharge media, 1 set of heavy duty hoses, instructions, and warranty card. Other accessories available separately.
